DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12 are drawn to a method for evaluating whether a material will allow bacteria to pass through, around or into the material, classified in class 435, subclass 340.
 - II. Claims 13-22 are drawn to a method for the evaluation of a material to determine whether the material is susceptible to bacterial contamination or colonization, classified in class 435, subclass 32.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as methods. The methods are distinct as claimed because they have different methods with different method steps; different functions and the effects have different final outcomes. Group I is drawn to a method for evaluating whether a material will allow bacteria to pass through, around or into the material. The method of Group II has a different function, evaluating whether a material is susceptible to contamination, which is entirely different than evaluating whether bacteria will pass through a material. The method of group I does not produce the same results. Each group produces different effects and different functions when compared to the other group. Therefore, the inventions are unrelated.

Art Unit: 1645

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ja-Na A Hines whose telephone number is 703-305-0487. The examiner can normally be reached on Monday-Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette Smith can be reached on 703-308-3909.
